THREAD TENSIONERS

MONO · SCREW · PRESSED COG ANCHOR · CANULA COG 4D-COG 360°

BEAUTY ENERGY // MAKES ALL THE DIFFERENCE

Reabsorbable thread designed with advanced technology and professional R&D experts.
Provides satisfactory and adequate solutions for skin rejuvenation and lifting effect.

BENEFIT OF THE LIFTING EFFECT THREAD

- Immediate effect.
- Minimal invasion.
- Short-term treatment.
- Less downtime and recovery.
- Natural appearance, fast recovery.
- Very good synergy with other treatments, such as fillers as botulinum toxin.

EFFECTS

- Skin rejuvenation, tension and revitalization.
- Immediate lifting.
- Tightening of wrinkles.
- Contouring on face and body

FEATURES

- High quality absorbable threads.
 - Optimal spiculated yarn design.
 - Excellent quality control.
 - Individual vacuum packed.
- Ultra thin walls of needles and cannulas.
 - Smaller diameter needles and cannulas.
- Electrolytic rectified special cannula.
 - Minimal damage to blood vessels and skin.
- Coating with special technology.
 - Minimal resistance during insertion.
 - More ergonomic design to facilitate insertion.

MONO

Used for the **revitalization** of the skin and firmness in areas of the face and body. They can also be combined with other types of threads.

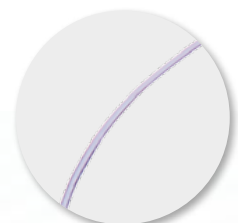

FEATURES

- High quality mono filament yarns.
- Double bevel needle.

EFFECTS

- Reduction of fine wrinkles.
- Tightening and revitalizing effect.

SPECS		
Needle Type MG		Thread
Diameter	Size	USP
27G	60mm	5-0
29G	50mm	6-0
30G	25mm	6-0

SCREW

Model designed to achieve a volumizing effect thanks to the spiral-shaped design.

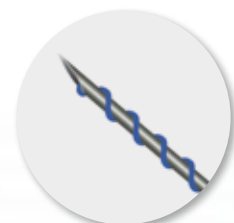

FEATURES

- Spiral-shaped design.
- Double bevel needle.

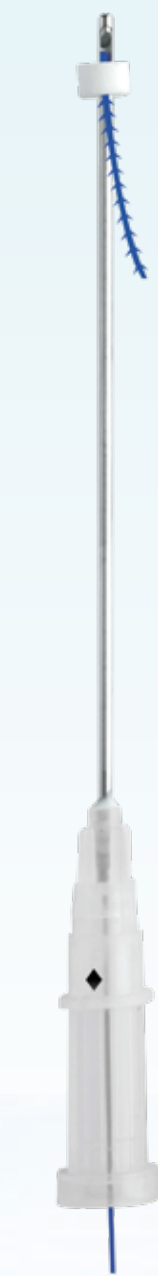

EFFECTOS

- Volumizing and local firmness.
- Remodeling of chin, double chin and neck.
- Fibrosis surface greater than in monofilament.

SPECS		
Needle Type MG		Thread
Diameter	Size	USP
26G	60mm	5-0
27G	50mm	5-0
29G	50mm	6-0

PRESSED COG ANCHOR

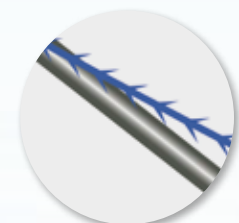

FEATURES

- Maximum anchoring threads for traction. Thanks to its cone structure, the tensile power is much higher.
- Application with high quality type L cannulas.
- Low traumatic insertion.

EFFECTS

- Face lifting effect and improvement of the facial contour.
- Improvement in body contours.
- Great tension effect on skins with a lot of elastosis.
- Thick threads with long reabsorption.

SPECS		
L-type cannula		Thread
Diameter	Size	USP
18G	100mm	2
19G	60mm	2

CANNULA COG 4D-COG 360°

Ultra-thin-walled L-type cannula. Maximum anchorage. Lifting effect.

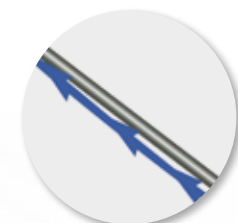

FEATURES

- Bidirectional and 4 dimensional spiculated thread.
- Ultra thin wall and electrolytic polish of the cannula.
- L-type cannula.

EFFECTS

- Contouring on face and body.
- Maximum anchorage in facial and body treatments.

SPECS		
L-type cannula		Thread
Diameter	Size	USP
19G	90mm	0
20G	60mm	2-0
20G	100mm	2-0
23G	90mm	3-0
