

THE SYNERGY OF 4 PRODUCTS FOR AN EFFECTIVE AND SAFE RESULT
EPIDERMAL RESTRUCTURING FOR THE WHOLE YEAR

LINE WITH DMAE - ORGANIC SILICON - ANTIOXIDANTS

BIOREVITALIZING, WHITENING AND LIFTING ACTION

THE BIO REGENERATION AND EPIDERMAL BIO RESTRUCTURING

TMC 3+ is a combination of active ingredients of new generation, which in synergy offers us:

- Low ph solution (1.5)
- Lifting action
- Antioxidant action
- Epidermal regeneration
- Depigmenting and moisturizing action

BIO REVITALIZANTE

Action produced by TCA.

ANTIOXIDANT

Vitamin C, resveratrol, lipoic acid, lactobionic acid.

LIFTING ACTION

(DMAE).

REGENERATING

TCA acid, kojic acid, mandelic, lactobionic acid.

WHITENING

Mandelic acid, kojic acid, vitamin C.

MOISTURIZING

Lactobionic acid.

ANTI-AGING

Organic silicon.

ADVANTAGES OF TMC 3+ ACTION

- It does not contain chemical buffering agents with aggressive action (ammonia, sodium).
- It does not cause photosensitization so it does not generate epidermal lesions.
- Non-aggressive exfoliation.
- Short treatment sessions (between 7 and 15 days depending on the phototype and skin type).
- Adapted to all types of patients in terms of age and sex.
- Can be used throughout the year.
- It has an expiration date of 36 months and does not necessarily have to be kept in the refrigerator.

TMC 3+ USE PROTOCOL

IMPORTANT NOTE: Always with powder-free gloves and changing them in each of the steps

1

PH-BALANCE

- It is a serum based on mandelic, kojic, pyruvic, glycolic and lactic acid in order to equalize the pH of the skin in the areas to be treated.
- Thanks to the synergy of kojic acid and vitamin C, a whitening and antioxidant effect is produced.

APPLICATION:

- Let it act for about two minutes. It is then removed with gauze moistened in water or serum.

2

TMC 3+

- Bio-chemical revitalization based on trichloroacetic acid, mandelic, lactic acid, vitamin C, resveratrol and organic silicon.
- Slows down the effects of skin aging, stimulating fibroblasts without causing irritation to the epidermis.

APPLICATION:

- Two applications with a total amount of 1 ml to 1.5 ml of product on the face, neck and neckline, carrying out an energetic massage in these areas to be treated. On reactive or sensitive skin, a single application is made (maximum 1 ml).
- We always control the itch by talking with the patient and observing the erythema on the skin.
- Buffer after a maximum of 5 min, depending on the effects felt by the patient.

3

NEUTRO-ACTIVE

- It is a buffer serum based on DMAE, panthenol and lipoic acid that modulates the action of TCA.
- Absence of ammonia or similar substances.

APPLICATION:

- A small amount is enough for all the treated areas and the itching, if any, disappears immediately.

4

LENIPROTEX

- Essential cream in the post treatment.
- Anti-inflammatory, soothing redness and anti-irritant thanks to the combination of 18 Beta Glyceric acid and Bisabolol.
- Regenerating and moisturizing thanks to collagen, vitamin E, hyaluronic acid and organic silicon.
- Solar protection.

APPLICATION:

- Spread a layer over all the treated areas until completely absorbed.

Repeat 1 session / week for 4 weeks

Maintenance sessions are recommended every 4 months

BIOREVITALIZING, WHITENING AND LIFTING ACTION

- **It is not invasive**
- **Softens the skin**
- **Visible results from the first application**

It is indicated for:

- Prevention of skin aging
- Relaxation of the skin
- Active and scar acne
- Discolorations
- Stretch marks

CE PH1.5
MEDICAL DEVICE

TMC 3+ CANNOT ONLY BE USED ON THE FACE

be
biolifesthetic
